ic-portfolio.streamlit.app

PROFESSIONAL SUMMARY

Senior Business Intelligence & Analytics Manager with 14+ years turning fragmented sales, finance, marketing, and operations data into decision systems used by executives, clients, and field teams. Leads analytics strategy, KPI governance, product roadmaps, and cross-functional delivery while remaining hands-on with Power BI, Snowflake, SQL, and Python. Automated a \$55M quarterly reporting process from 350+ analyst hours to two and built e-commerce analytics that increased conversion by 33%.

PROFESSIONAL EXPERIENCE

Advantage Solutions

Senior Business Intelligence & Analytics Manager

Oct 2021 - Present

Owned end-to-end BI and analytics across sales, program performance, financial reporting, governance, and executive decision support

Scope: 5 client programs | 7 regional leadership teams | 250+ stakeholders | \$55M quarterly reporting

- Partnered with client executives and regional leaders to establish weekly operating and monthly and quarterly business reviews that connected forecasts, variance drivers, risks, and recommendations to action, cutting preparation time from five days to 24 hours and supporting decisions associated with 9% quarter-over-quarter revenue growth and a 10% ROI improvement
- Aligned client program teams and regional leadership groups on analytics priorities and 30 standardized KPIs, creating a shared performance framework that surfaced approximately \$300K per quarter in spend misallocation and enabled same-week budget reallocation
- Led a field reporting network of seven managers by assigning KPI ownership, setting reporting standards and review cadences, and coaching data quality and insight communication, reducing discrepancies by 50%, improving QBR forecast accuracy, and standardizing reporting across regions
- Owned the analytics roadmap and discovery-to-deployment lifecycle for 250+ stakeholders, prioritizing requests, validating business requirements, and replacing 47 shadow trackers with governed self-service reporting that tripled adoption and reduced metric conflicts by 70%
- Automated a \$55M quarterly reporting process across 99 vendor contracts and six source systems, reducing analyst effort from 350+ hours to two through Snowflake, Power BI, SQL, Python, and automated quality and audit controls

Modern Home Station

BI Strategy & Analytics Manager

Feb 2018 - Sep 2021

Built the analytics function for a DTC e-commerce business, integrating acquisition, customer behavior, merchandising, inventory, fulfillment, and financial data into a unified operating model

- Unified customer, campaign, order, and financial data across Google Analytics/GA4, Shopify, Meta Ads, and Klaviyo, guiding channel investment decisions that reduced CPA by 18% and contributed to revenue growth of 45% in FY19 and 85% in FY20
- Led A/B and multivariate testing across product, content, and customer journeys, using funnel, cohort, and segmentation analysis to increase total conversion by 33%
- Built an integrated demand-planning process aligning campaign forecasts, inventory requirements, fulfillment capacity, and financial planning, reducing the planning cycle by 25%
- Improved carrier selection and customer communications through shipping-performance analysis, reducing missed delivery windows by 55% and shipping costs by 18%

China Unicom America

Business Development Manager

Jul 2016 - Aug 2017

Led pricing, demand, reporting, and market-entry analytics supporting B2B telecommunications expansion

- Developed pricing, demand, and GTM forecasting models producing \$1.8M in revenue projections and guiding enterprise sales targeting, market prioritization, partner selection, and lead-generation planning
- Translated customer demand, technical capacity, pricing, and rollout requirements into coordinated market-entry and channel plans across sales, engineering, and partner teams

Marshall Electronics

Project Analyst

Sep 2014 - May 2016

Managed international product-launch analytics and execution across commercial, product, operations, inventory, manufacturing and engineering teams

- Coordinated 50+ international product launches across retail channels, **contributing to \$5M** in annual sales and achieving a 95% on-time launch rate
- Built launch-readiness dashboards and issue-tracking workflows covering timelines, inventory, sell-through, channel adoption, and delivery risks, enabling earlier issue escalation across product and operations teams

Cadence Acoustic Ltd. / Deccon International Ltd.

Senior Business Analyst

Jul 2012 - Jul 2014

Business Analyst

Jun 2010 - Jun 2012

Built commercial analytics and reporting systems supporting pricing, demand planning, inventory, sales operations, channel performance, and merger integration across global consumer-electronics product lines

- Designed pricing, demand-forecasting, inventory, and channel-performance models supporting planning for \$500M+ in product lines across Amazon FBA, eBay, retail distributors, and internal operations
- Led data migration, process standardization, and reporting consolidation during a company merger, integrating separate sales and inventory systems into a unified analytical framework for pricing, demand, fulfillment, and territory analysis

SELECTED ANALYTICS PROJECTS

Business Performance & Decision Support Portfolio

jc-portfolio.streamlit.app

Built six interactive BI applications on a \$387M operational dataset across 12 accounts, enabling account-level decisions on revenue concentration, profitability, forecasting, and scenario tradeoffs using Power BI, SQL, Python, pandas, NumPy, and Streamlit
