

Jason C. Chang

Owens end-to-end analytics from data modeling to executive decision support, focused on revenue performance, forecasting, risk identification, and cross functional leadership.

Senior Business Intelligence & Analytics Manager

(626) 203-3319 | Hacienda Heights, CA | [linkedin.com/in/jchang0102](https://www.linkedin.com/in/jchang0102) | jason.chang01022024@gmail.com

Portfolio: jc-portfolio.streamlit.app

Interactive analytics applications demonstrating revenue forecasting, customer concentration risk, and product performance—built to mirror real-world BI decision workflows.

- Built end-to-end analytics system simulating real-world BI workflows (data modeling → transformation → executive decision layer)
- Designed revenue, customer, and product models to surface growth drivers, concentration risk (Top-N contribution), and performance trends (MoM)
- Structured outputs around business decisions and trade-offs, not reporting, aligning with executive consumption patterns

PROFESSIONAL SUMMARY

Senior Business Intelligence & Analytics leader owning end-to-end data systems from modeling to executive decision support across \$1B+ enterprises. Specialized in unifying fragmented data environments, establishing governance frameworks, and translating complex data into actionable insights on revenue performance, forecasting, and operational efficiency. Proven track record of eliminating manual reporting, aligning cross-functional stakeholders, and enabling faster, data-driven decisions through scalable Snowflake and Power BI ecosystems.

TECHNICAL SKILLS

Data Platform & Warehousing: Snowflake, BigQuery, SQL Server (SSMS), AWS, Data Warehousing, ETL/ELT Pipeline Design, Data Governance, Star Schema Design

BI, Visualization & Marketing Tools: Power BI (DAX, Power Query, Python Visuals, RLS), Looker, Qlik Sense, QlikView, Google Data Studio, Excel (Advanced); GA4, Meta Ads, Shopify, HubSpot

Programming & Automation: SQL, Python (pandas, seaborn, openpyxl, Selenium), VBA, dbt (conceptual)

Analytics Methods: Forecasting, Attribution, A/B/Multivariate Testing, K-Means Clustering, Cohort Analysis, Predictive Modeling, Funnel & Demand Modeling

Leadership: Stakeholder Management, Cross-Functional Collaboration, Data Governance Frameworks, Team Mentorship

EXPERIENCE

Advantage Solutions

Remote

BI & Analytics Manager – Marketing Insight & Program Improvement

Oct 2021 – Present

Managing analytics for sales and royalty programs within a \$1.68B enterprise, driving the BI strategy, stakeholder alignment, and analytics team development across retail clients including Walmart, Target, Kohl's, and Ross.

- Unified POS, field, and promotional data into a centralized Snowflake + Power BI ecosystem, establishing a **single source of truth for 250+ stakeholders and reducing KPI conflicts by 70%**
- Engineered end-to-end royalty processing system (\$55M across 99 vendor contracts, 6 source systems), integrating Python ETL, dynamic schema handling, and automated reporting, reducing quarterly processing from **350+ analyst-hours to 2 hours**
- Designed star schema data models and governed metric definitions (40+ DAX measures), enabling **same-week budget reallocation decisions and contributing to 9% quarterly revenue growth**
- Led analytics standards, KPI governance, and development across 7 regional managers, ensuring **consistent metric definitions and scalable reporting frameworks across national programs**
- Audited post-merger data warehouse across 5 legacy systems, eliminating 47 shadow Excel trackers so finance and operations could reconcile against one unified dataset instead of five
- Established enterprise data governance framework (metric change control, QA validation, executive review cadence), ensuring **trust, consistency, and adoption across cross-functional reporting**

Modern Home Station

Remote

BI Strategy & Analytics Manager

Oct 2017 – Sep 2021

Led analytics initiatives for a DTC eCommerce startup, building the data infrastructure from zero — unifying fragmented data across Facebook, Shopify, Google, and Klaviyo to drive marketing, operations, and customer experience decisions.

- Built cross-channel attribution system across GA4, Shopify, Meta, and Klaviyo, enabling **data-driven budget allocation that reduced CPA by 18% and drove 45%–85% revenue growth**
- Led multivariate testing program across product, content, and UX, identifying high-impact variables that increased **conversion by 33% and reduced CPM by 36%**
- Applied behavioral clustering (K-Means) to segment customers, enabling **targeted acquisition strategies that doubled ROAS**
- Analyzed shipping delay patterns by country and carrier, identified underperforming logistics partners, and built customer notification system — reducing unmet delivery expectations by 75% and cutting shipping costs by 18%
- Built unified demand forecasting system integrating marketing, operations, and inventory data, reducing **cross-team decision latency by 40%**

China Unicom America

Los Angeles, CA

BI & Strategic Development Manager

July 2016 – Aug 2017

Supported B2B telecom market expansion through analytics, forecasting, and reporting automation across enterprise sales operations.

- Architected pricing and demand forecast models delivering \$2M+ revenue projections, guiding enterprise sales targeting
- Partnered with Engineers to optimize channel rollout and partner strategy, expanding B2B client acquisition, and automated performance reporting, improving pipeline visibility and reducing planning cycles by 50%

Marshall Electronics

Torrance, CA

BI Project Analyst

Sep 2014 – May 2016

Managed analytics and reporting supporting international product launches and supply chain coordination across consumer electronics, including cross-functional vendor management with manufacturing in China, Taiwan, South Korea, and Japan.

- Drove 50+ international product launches across retail channels, generating \$5M in annual sales
- Coordinated QA, engineering, marketing, and warehouse teams across US and China to localize products by region, achieving 95% on-time launch rate
- Developed launch tracking dashboards for timelines, inventory, and sell-through performance, enabling real-time visibility into channel adoption

Cadence Acoustic Ltd. / Deccon International Ltd.

Industry, CA

Senior Business Analyst

Jun 2010 – Jul 2014

Developed analytics systems supporting inventory forecasting, sales operations, and multi-site merger integration across global consumer electronics product lines.

- Designed pricing and demand forecast models improving inventory management and reporting accuracy across \$500M in product lines
- Led data migration and reporting consolidation during company merger, unifying two separate inventory and sales systems into a single analytical framework
- Managed online channel analytics across Amazon FBA, eBay, and retail distributors, enforcing price integrity and resolving distributor territory conflicts that impacted customer service capacity
